Decision Directed Noise Estimate for 8-PSK
4th Moment of Angle Velocity of Signal Decimated by 3
Stdev of 2nd Power of 10-bin Moving Average Window
Decision Directed Noise Estimate for QPSK
Stdev of Angle Velocity of Signal Decimated by 16
Decision Directed Noise Estimate for QAM32
Stdev of 20-bin Moving Average Window Squared
Tau=8 Modified Allan Deviation of Angles of Signal Lowpassed to 3.75% BW
Tau=2 Modified Allan Deviation of Signal Decimated by 3
Decision Directed Noise Estimate for QAM64
Tau=4 Modified Allan Deviation of Angles of Signal Lowpassed to 3.75% BW
Tau=16 Modified Allan Deviation of Angles of Signal Lowpassed to 3.75% BW
Circular Autocorreation of Raw Signal, bin=1 (0=center)
Mean of 4th Power of 15-bin Moving Average Window
Decision Directed Noise Estimate for APSK16
Median of 4th Power of 10-bin Moving Average Window
Decision Directed Noise Estimate for QAM16
Stdev of Absolute Value of Tracked Symbols
Circular Autocorreation of Raw Signal, bin=2 (0=center)
Skewness of Low Resolution (16 Averages) Power Spectral Density
Tau=1 Modified Allan Deviation of Signal Decimated by 3
Decision Directed Noise Estimate for APSK32
Mean of 4th Power of 20-bin Moving Average Window
Circular Autocorreation of Signal Decimated by 16, bin=13 (0=center)
Mean of 2nd Power of 15-bin Moving Average Window
Circular Autocorrelation of Signal Decimated by 16, bin=10 (0=center)
Stdev of Low Resolution (16 Averages) Power Spectral Density
Reverse Cicular Convolution of Signal Decimated by 16, bin=3 (0=center)
Median of 4th Power of 20-bin Moving Average Window
Tau=8 Modified Allan Deviation of Angles of Signal Lowpassed to 2.50% BW
